

COVID-19

BOOSTER VACCINATION?

WHO SHOULD GET IT?

- **People 65 years and older and residents in long-term care settings should receive a booster shot of Pfizer-BioNTech's COVID-19 vaccine at least 6 months after their PfizerBioNTech primary series.**
- **People aged 50–64 years with underlying medical conditions should receive a booster shot of Pfizer-BioNTech's COVID-19 vaccine at least 6 months after their PfizerBioNTech primary series.**
- **People aged 18–49 years with underlying medical conditions may receive a booster shot of Pfizer-BioNTech's COVID-19 vaccine at least 6 months after their Pfizer-BioNTech primary series, based on their individual benefits and risks.**
- **People aged 18–64 years who are at increased risk for COVID-19 exposure and transmission because of occupational or institutional setting may receive a booster shot of Pfizer-BioNTech's COVID-19 vaccine at least 6 months after their Pfizer-BioNTech primary series, based on their individual benefits and risks.**

**Only the Pfizer-BioNTech Covid-19 vaccine has been authorized as a booster dose, and the above recommendations will only apply to individuals who received the Pfizer-BioNTech COVID-19 vaccine for their primary series.*
